

## SUPPLEMENTARY FIGURE

**Supplementary Figure 1. APG treatment increased the mRNA expression of Nrf2 and its downstream signal NQO-1 and GCLC-1, respectively.** (A) Nrf2 mRNA expression, (B) NQO-1 mRNA expression, (C) GCLC-1 mRNA expression at 24 h after reperfusion. \*\*\*  $P < 0.001$  I/R = ischemia/reperfusion.
